

Deeva Civia Aulia Lolong

I am a Full Stack Developer with a strong foundation in Artificial Intelligence. My experience goes beyond building and deploying enterprise-grade web applications from scratch. It also spans implementing LLM integrations and training deep learning models like ResNet. I am a dedicated problem-solver who values server optimization, database automation, and rapid technology adaptation.

Manado, North Sulawesi | deevacivia@gmail.com | +6281344388067 | [linkedin.com/in/deevacivia/](https://www.linkedin.com/in/deevacivia/)

EDUCATION BACKGROUND

Universitas Klabat

Bachelor of Computer Science (Informatics). GPA 3.95 out of 4.00

Manado, North Sulawesi

Aug 2022 – May 2026

- Relevant Courses: Web Development, DevOps Engineering, Database Management Systems, Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Artificial Intelligence. Consistently maintained a high GPA while actively participating in student organizations and completing a full-scale web development internship.
-

PROFESSIONAL EXPERIENCES

Full Stack Developer Intern

Manado Independent School

Manado, North Sulawesi

Jul 2025 – Dec 2025

- Executed the full SDLC** of a Student Registration System entirely from scratch within a 6-person team, utilizing **Kanban methodology** from stakeholder brainstorming to final deployment.
 - Engineered backend infrastructure with **Laravel**, writing **complex database queries and business logic**, and integrated **React.js** frontend components with a strict **Role-Based Access Control (RBAC)**.
 - Optimized dashboard performance and accelerated enrollment by implementing intelligent **Laravel Caching** for **automated cache invalidation** and an **auto-fill data history feature**.
 - Automated student enrollment status updates based on the academic year by configuring **Ubuntu Cron Jobs** seamlessly linked to **Laravel Scheduler**.
 - Acted as the **primary code merger** via **GitHub** to **resolve merge conflicts**, conducted **Postman** testing, and **troubleshooted real-world production bugs reported by users** to deploy rapid hotfixes on an **Ubuntu server**.
-

ORGANIZATIONAL & VOLUNTEER EXPERIENCES

Computer Science Student Association | Universitas Klabat

BEM Education & Senate Batch 2022

Manado, North Sulawesi

Aug 2024 – Dec 2025

- Served as a tutor for **20+ students** in a fundamental **Computer Programming (Python)** study program for one semester.
- Taught an intensive **JavaScript** Mini Bootcamp for **10 students** over one semester to enhance their web development skills.
- Bridged the information flow between the dean's office and hundreds of students from the Class of 2022, and structurally **managed the delivery of student feedback and aspirations**.

Faculty Event Committees (Filkom Day & FX Media Exhibition) | Universitas Klabat

Group PIC & Floor Crew

Manado, North Sulawesi

Sep 2024 – Apr 2025

- Led field coordination and managed logistics operations (food and equipment distribution) for a group of **30+ freshmen** during the Filkom Day event.
 - Directed and facilitated **90 participants** alongside external professional tutors during the FX Media multimedia workshop.
-

PROJECT

MISmart: AI Gemini Integration on Information System - Thesis

Informatics Major Project

Universitas Klabat

Jan 2026 – May 2026

- Engineered a **hybrid NL2SQL** module integrated into a custom **Laravel** and **React.js** web system using **Google Gemini 2.5 Flash API**, utilizing advanced In-Context Learning (**Schema Linking & Few-Shot prompting**) to navigate **20+ relational tables** while optimizing latency via direct SQL routing for standard requests.

- **Secured the AI pipeline with multi-layered defenses**, implementing backend **Regex** validation and strictly limiting database execution through a dedicated **read-only (SELECT)** user to prevent injection attacks.
- **Developed a dynamic client-side Excel generator in React** and a secondary LLM pipeline, using **complex matrix tables** and conditional logic to seamlessly parse unpredictable AI payloads into human-readable narratives and automated reports.
- **Eliminated human error and accelerated data processing** during peak periods (**60+ daily registrations**), empowering executive management to instantly extract dynamically combined data tailored to the institution's SOP.

Poverty Detection via Satellite Imagery

Subject Machine Learning

Universitas Klabat

Jan 2026 – May 2026

- **Developed a multi-class Computer Vision model** using **Python** and **ResNet-50** transfer learning to classify regional poverty levels in La Paz, Bolivia, in direct alignment with UN SDG 1.
- **Mitigated data imbalance and overfitting** by integrating Global Average Pooling, Dropout layers, and an end-to-end data augmentation pipeline.
- **Achieved an exceptional 98.67% prediction accuracy** and 0.99 F1-Score, delivering a highly reliable and scalable solution for real-world socio-economic mapping.

Automated Server Monitoring & CI/CD Pipeline

Subject DevOps Engineering

Universitas Klabat

Jan 2026 – May 2026

- **Engineered a fail-safe CI/CD pipeline** using **Jenkins** and **GitHub webhooks**, automating pre-deployment testing for **Laravel** and **React** to ensure zero-fail production releases.
- **Developed an AI-driven server monitoring system** utilizing **Gemini 2.5 Flash** to analyze server logs for brute-force attacks, pushing real-time mitigation alerts via **Fontte WhatsApp Gateway**.
- **Hardened Ubuntu Apache production servers** by configuring UFW firewalls, masking default SSH ports, and applying strict .htaccess security headers to mitigate vulnerabilities.
- **Automated critical server maintenance** by writing **cron jobs** for daily database backups with a strict 7-day rolling retention policy to optimize storage.

SKILLS & LANGUAGES

- **Programming Languages:** PHP, JavaScript, Python, SQL.
- **Frontend & Mobile:** React.js, React Native, HTML/CSS, Bootstrap.
- **Backend & Database:** Laravel, MySQL, Firebase (Firestore, Auth), RESTful APIs.
- **AI & Machine Learning:** Gemini LLM API, Prompt Engineering (NL2SQL, In-Context Learning, Schema Linking, Few-Shot), Computer Vision, ResNet-50, TensorFlow.
- **DevOps & Security:** Jenkins CI/CD, Ubuntu Server (Apache), Cron Jobs, Server Hardening (UFW Firewall, SSL).
- **Tools & Version Control:** Git/GitHub, Postman, Adobe Photoshop (Certified).
- **Languages:** Indonesian (Native), English (Intermediate)

CERTIFICATIONS & LICENSES

- **Adobe Certified Professional:** Visual Design using Adobe Photoshop | 2026
- **ID Camp by Indosat Ooredoo Hutchison (Dicoding Indonesia):** React Developer Learning Path | 2024
- **SoloLearn:** Web Development | 2024
- **Alibaba Cloud:** Alibaba Cloud Certified Developer | 2024
