

Deeva Civia Aulia Lolong

Dedicated Computer Science graduate specializing in Full Stack development and AI integration. Proven experience in building enterprise-grade information systems from scratch, server optimization, and database automation. Demonstrated rapid technology adaptation through various industry certifications and innovative projects.

Manado, North Sulawesi | deevacivia@gmail.com | +6281344388067 | [linkedin.com/in/deevacivia/](https://www.linkedin.com/in/deevacivia/)

EDUCATION BACKGROUND

Universitas Klabat

Bachelor of Computer Science (Informatics). GPA 3.95 out of 4.00

Manado, North Sulawesi

Aug 2022 – May 2026

- Relevant Courses: Web Development, DevOps Engineering, Database Management Systems, Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Artificial Intelligence. Consistently maintained a high GPA while actively participating in student organizations and completing a full-scale web development internship.
-

PROFESSIONAL EXPERIENCES

Full Stack Developer Intern

Manado Independent School

Manado, North Sulawesi

Jul 2025 – Dec 2025

- Collaborated within a 6-person cross-functional team using Kanban methodology to build a Student Registration System entirely from scratch, actively engaging in the full SDLC, from stakeholder brainstorming to live bug fixing.
 - Architected backend infrastructure using Laravel, writing complex database queries and business logic in collaboration with a Database Engineer.
 - Accelerated the enrollment process by developing an auto-fill data history feature for returning students.
 - Integrated React.js frontend components with backend APIs, developing additional features to ensure a seamless user experience.
 - Optimized dashboard and analytics load times by implementing Laravel Caching and Event Listeners for intelligent, automated cache invalidation.
 - Automated student status updates (active/inactive) by configuring Cron Jobs on an Ubuntu server linked to Laravel Scheduler.
 - Secured institutional data access by building a strict Role-Based Access Control (RBAC) system for Admin-level authorities.
 - Conducted rigorous system and API testing using Postman prior to deployment, ensuring stable and bug-free frontend-backend integration.
 - Managed GitHub version control across multiple team branches, acting as the primary code merger. Resolved merge conflicts, pushed updates to the main branch, and executed direct deployments to the Ubuntu production server.
 - Troubleshoot real-world production bugs reported by users, delivering rapid hotfixes to maintain system reliability.
-

ORGANIZATIONAL & VOLUNTEER EXPERIENCES

Computer Science Faculty Student Executive Board (BEM) | Universitas Klabat

Education Division Crew & Class of 2022 Coordinator

Manado, North Sulawesi

Aug 2024 – Dec 2025

- Served as a tutor for 20+ students in a fundamental Computer Programming (Python) study program for one semester.
- Taught an intensive JavaScript Mini Bootcamp for 10 students over one semester to enhance their web development skills.
- Bridged the information flow between the dean's office and hundreds of students from the Class of 2022, and structurally managed the delivery of student feedback and aspirations.

Faculty Event Committees (Filkom Day & FX Media) | Universitas Klabat

Group PIC

Manado, North Sulawesi

Sep 2024 – Apr 2025

- Led field coordination and managed logistics operations (food and equipment distribution) for a group of 30+ freshmen during the Filkom Day event.
- Directed and facilitated 60+ participants alongside external professional tutors during the FX Media multimedia workshop.

PROJECT

MISmart: AI Gemini Integration on Information System - Thesis

Informatics Major Project

Universitas Klabat

Jan 2026 – May 2026

- Engineered a Natural Language to SQL (NL2SQL) module using Google Gemini 2.5 Flash API, implementing advanced Prompt Engineering (Schema Linking and Few-Shot prompting) to navigate a complex relational database of 20+ tables and master data.
- Developed a robust parsing mechanism using matrix tables and conditional logic to handle dynamic and unpredictable LLM outputs, ensuring accurate conversion of AI search results into automated Excel reports.
- Eliminated human error and drastically reduced data processing time during peak periods (60+ daily registrations) by enabling executive management to instantly extract specific data combinations tailored to the institution's SOP.

Poverty Detection via Satellite Imagery

Subject Machine Learning

Universitas Klabat

Jan 2026 – May 2026

- Built an artificial intelligence model to classify poverty levels in La Paz, Bolivia, using satellite imagery data.
- Implemented the ResNet-50 Deep Learning architecture and successfully achieved a prediction accuracy rate of 98%.

Automated Server Monitoring & CI/CD Pipeline

Subject DevOps Engineering

Universitas Klabat

Jan 2026 – May 2026

- Configured a continuous integration/continuous deployment (CI/CD) pipeline using Jenkins for automated testing and deployment.
- Engineered an automated server monitoring system (access, errors, SSH warnings) utilizing AI to provide instant troubleshooting recommendations.

SKILLS & LANGUAGES

Skills: Full Stack Web Development (Laravel, React.js), Database Management (MySQL), DevOps & Server (Ubuntu, CI/CD Jenkins, Cron Jobs), AI Integration (Gemini LLM, Prompt Engineering), Machine Learning (Python, ResNet-50), Graphic Design (Adobe Photoshop - Certified).

Languages: Indonesian (Native), English (Intermediate)

CERTIFICATIONS & LICENSES

- **Adobe Certified Professional**
Visual Design using Adobe Photoshop | 2026
- **ID Camp by Indosat Ooredoo Hutchison (Dicoding Indonesia)**
React Developer Learning Path – Certificate of Competence | 2024
- **AWS Back-end Academy (Dicoding Indonesia)**
Back-end Web Development & Amazon Web Services (AWS) – Certificate of Competence | 2025
